

Road to Learning and Earning

Lesson Plan

Topic/Title of Plan: Addition With Decimals

Lesson Developed By: Jamie Smith

School: St Stephens High School, Catawba County

Objective Being Taught	Use equations to solve problems using addition with decimals.
RTLE Matrix Objective	By reviewing functional life skill resources, provide students and families with skills for living as independently as possible in the community.
Student Audience/Length	9-12+
Materials/Resources Needed	<ul style="list-style-type: none">• Smartboard• edhelper.com• school based enterprise
Teaching Procedure	Teachers order coffee for their classroom using a prepared list. Students prepare the coffee to be delivered to classroom. Student counts the number of coffees and decides how much will be collected when delivered. Student also must decide and prepare what type of change (\$1, \$5, \$10) is needed for purchases. Collect money and make change as necessary. This amount changes daily. Staff oversees collection and change made by students.
Check for Understanding and Assessment of Lesson	Teacher made data sheets. This is a 100% right or wrong activity
Wrap Up/Review	This is an on-going lesson. We periodically do paper and pencil tests to check for further understanding.
